

USB 2.0 Security Key Fingerprint Mini Flash Drive

The “Security Key” 2.0 USB Flash Drive is equipped with the leading biometric technology that allows only authorized users to access data using fingerprint technology. Because your fingerprint is so unique from any other, no one can duplicate or steal your identity.

Unlike other biometric products, “Security Key” will let you store up to 5 fingerprints for you to access data. Using the special feature, you can share confidential files with a group of people you choose.

Features:

- Compliant with USB specification rev. 2.0 (USB 1.1 Compatible)
- Verification speed < 1 second
